The State of the Science in Universal Design: Emerging Research and Developments

www.benthamscience.com/ebooks/9781608050635

About the ebook

The Rehabilitation Engineering Research Center on Universal Design and the Built Environment (RERC-UD) hosted a series of State of the Science (SOS) Activities in 2008. The SOS activities generated a large number of papers on both research and the practice of universal design in community infrastructures, public buildings, and housing. This Ebook contains a selected group of these papers that provide a survey of notable developments in the field, reflections on how research and practice can be advanced further, and propose an agenda for the near future.

Contents

- ▶ Advancing Universal Design
- ▶ Emerging Markets for Great Design
- ▶ Evidence-Based Practice (EBP) in Universal Design
- ▶ Benchmarking the Effectiveness of Universal Designs
- ▶ Using Human Factors Research as an Evidence Base
- ▶ Advancing Universal Design through Evidence Based Practice: Residential Environments
- ▶ Advancing Universal Design through EBP: Work Environments
